Storyline

The HR manager publishes a company update. An employee reacts, a manager comments, and HR creates a project group. The group is used to create direct and group chat threads, schedule an appointment, and validate real-time chat plus audio/video call signaling.

Test Cases

ID	Use Case	Role	Result	Evidence	Notes
AUTH_EMPLOYEE	Demo login for employee	employee	PASS	API /demo/login	demo.employee@aurorahr.in

Residual Production Note

Audio/video media negotiation uses browser WebRTC with STUN. This test validates authenticated signaling and browser media hooks. A TURN server is still recommended before promising reliable calls across restrictive corporate networks.
