VIS_ATT_ADMIN_01	Leadership/admin attendance view	<i>admin</i>
VIS_LEAVE_ADMIN_01	Leadership/admin leave view	<i>admin</i>

Product Gaps Observed

Attendance Mass Update UI opens a modal, but the current frontend handler is not wired to the real `/attendance/bulk-update` endpoint. The backend endpoint was verified separately.

Attendance Sync UI currently uses mock preview/save behavior. Production-grade device/file import needs backend persistence and audit results.

The live production `/attendance/by-department` report failed because it referenced a non-existent department column. This branch fixes the query to use `Department.name` while preserving the `departmentName` API alias.

Attendance/Leave pages do not yet expose a polished monthly report export/dashboard experience beyond current CSV/table summaries.
